# Sketch Plugin for Marvel

A match made in heaven

How to install:

Unzip the plugin, go to Sketch, in the top menu select "Plugins" then "Reveal plugins folder...". Drag and drop the Marvel.sketchpluginbundle file into there.

Getting started:

Login to Marvel

To link your plugin to Marvel, select login from the menu and enter your details. *(note: If you sign into Marvel using Dropbox, you will need to set a password in the My Profile section)*
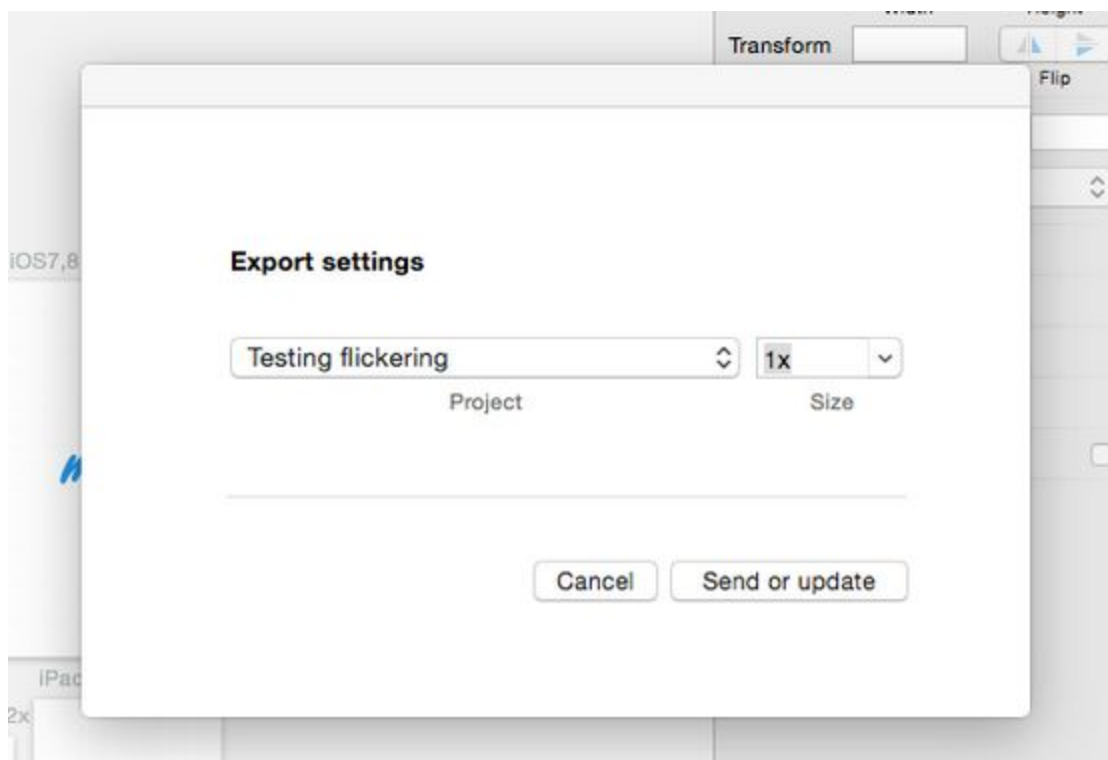

Send or Update all artboards to Project

Bulk upload every artboard into your project, this will also replace any existing files which have been uploaded with the same file name.

Send or updated selected artboard to project

If you only want to add or update a few artboard, then you can select them individually and choose this option.

Select export options

The plugin can export your images at whatever size you need, simply select or change the number in the size dropdown

Problems? Let us know so we can make this better!
